

CmpSci 201

Lab 4

## 1 Lab Description

Write a function `squarePlusOne`, where  $\text{squarePlusOne}(x) = (x+1)*(x+1)$ . This must be a real function, it should obey the calling convention explained in class and not clobber registers.

## 2 Submitting

To submit your answers, email the code to `trekp@cs.umass.edu` with the subject line set to: "CS201 Lab 4, <your name>", where <your name> is replaced with your actual name. Attach your code as files named `probl.s`.
