

Have you heard?

The School of Computer Science is developing a new program through BDIC...

INFORMATICS

Looking to pursue **game design**? Want to solve **real world** problems?

From economics to voting, astronomy to epidemiology... Informatics studies the **design, application, use, and impact** of computational principles and technology.

Interested?

Two basic Informatics courses are being offered in Fall 2013

CmpSci190DM, A Mathematical Foundation of Informatics

CmpSci 290NW, A Networked World

Professor Robert Moll

Computer Science Building Room 276
moll@cs.umass.edu
(413) 545-4315

Interested students should contact the faculty advisor for the new Informatics program

For More Information:

Visit www.cs.umass.edu/informatics for information about the program and bdic.umass.edu for information about BDIC.
